### Desirable Skills:

- Committed
- Good written and verbal communication skills
- A team player looking to learn,
- Attention to detail with a can do attitude.

### Here is what some past interns have to say:

#### **Ai Ling Yeng**, Ex- University of Sydney Student

"I was most appreciative of the balance of skills and knowledge that I was exposed to. I learnt that there is a lot more to Market Research than just numbers and statistics, working with 10 Thousand Feet was lots of fun, definitely worthwhile and overall, something that I would highly recommend to anyone looking to enter into a career of marketing."

#### **Brendan Smith**, Ex- University of Western Sydney Student

"I liked the hands on approach at 10 Thousand Feet, actually going out in the field and completing the projects. The open atmosphere at the workplace was great, questions were always answered and your opinion was asked on different aspects of projects. The different variety of projects keeps you interested and the fact that the work was project based means that you have the opportunity to see your work completed. Working at 10 Thousand Feet gave me a practical advantage to apply to the theory I was learning and the motivation to pursue a career in a Market research related field."

#### **Jacopo La Maida**, Ex-University of Bologna, Italy Student Intern, Currently Full Time Marketing and Research Assistant 10 THOUSAND FEET,

"10THOUSAND FEET is the ideal environment for a young graduate eager to do his/her first work experience in a professional environment. Having had the chance to be fully involved in the delivery and execution of high quality projects from the outset gave me the chance to grow professionally and absorb new competences (technical and personal) on a daily basis. I appreciated working within a company with such a strong ethic, whose ambitions go beyond the purely business sphere and where your opinion is always valued."
